

**Reed Resources** acquired the Meekatharra Gold Deposit in January 2011 and has been actively bolstering the resource and Reserve base for the last 18 months. Reed completed the BFS in February 2012 and are transitioning from Explorer to Producer with gold production planned for December 2012. Execution of this delivery date is planned and Reed are on target to meet this deadline. Reed Resources have successfully completed the capital equity raise of \$40M and are advanced in securing an additional debt facility.

On site there are existing facilities and infrastructure that are currently being upgraded and refurbished as part of the re-commencement of operations.

Reed plan to operate the processing plant at 1.6Mtpa / 95,000oz from initially open pits alone, with plans to expand the processing plant and operations to both open pits and underground ore sources after Year 2.
